📄 PROFILE

Backend-focused .NET Developer with experience developing and maintaining REST APIs, database-driven applications, authentication systems, and enterprise business workflows using C#, ASP.NET Core, Entity Framework Core, PostgreSQL, and SQL Server.

Experienced in backend architecture, relational database design, debugging, deployment preparation, Linux and VPS environments, Docker, GitHub, and CI/CD fundamentals. Comfortable taking ownership of backend services, investigating production issues, maintaining technical documentation, and working independently to deliver reliable software solutions.

🏢 PROFESSIONAL EXPERIENCE

Software Developer

04/2026 – Present | Ferizaj, Kosova

DataProgNet

- Develop and maintain enterprise web applications using C#, ASP.NET Core, Angular, REST APIs, and relational databases.
- Implement business workflows, role-based permissions, validation, notifications, reports, exports, and external integrations.
- Translate functional requirements into backend services, API endpoints, database queries, and user-facing features.
- Investigate and resolve application issues through debugging, log analysis, database inspection, and code review.
- Collaborate with developers and stakeholders to understand business decisions and deliver stable software solutions.
- Participate in testing, documentation, deployment preparation, and production support.

Full-Stack Developer

02/2023 – Present | Remote

Freelance / Self-Employed

- Build full-stack and backend-focused applications using ASP.NET Core, React, Next.js, Node.js, PostgreSQL, and SQL Server.
- Develop REST APIs, JWT authentication, refresh-token systems, role-based access control, audit logging, dashboards, and reporting features.
- Design database models and implement business logic for customers, invoices, organizations, permissions, and application workflows.
- Integrate frontend applications with APIs and develop responsive forms, tables, filters, dashboards, and administrative interfaces.
- Use Git and GitHub for source control, project organization, feature development, and release management.
- Deploy and maintain applications in Linux and VPS environments using Docker and CI/CD fundamentals.
- Configure and maintain Linux-based VPS environments, application deployments, environment variables, reverse proxy settings, SSL certificates, domains, and subdomains.

Web Developer

11/2024 – 09/2025 | Ferizaj, Kosova

OXA Group

- Developed and maintained web applications and internal business systems.
- Integrated frontend modules with APIs and database-driven workflows.
- Resolved bugs, improved application performance, and supported production feature delivery.
- Worked with reusable components, forms, tables, filtering systems, and responsive interfaces.
- Collaborated with team members to turn business requirements into working technical solutions.

Full Stack Developer

02/2024 – 10/2024 | Prishtina, Kosova

AlbiSoft GmbH

- Contributed to the development of enterprise platforms and content management systems.
- Developed reusable components, forms, tables, filters, exports, and API-integrated interfaces.
- Implemented frontend and backend improvements based on functional requirements.
- Improved code organization, maintainability, and user experience across existing applications.
- Assisted with debugging, testing, and resolving application issues.

🎓 EDUCATION

BSc in Industrial Engineering with Informatics

2019 – 2023 | Ferizaj

University of Applied Sciences in Ferizaj

- Object-Oriented Programming
- Databases and Information Systems
- Web Development
- Software Engineering
- Business Process Analysis
- Industrial and Management Systems

 SKILLS

Backend Development

C#, .NET, ASP.NET Core, REST APIs, Entity Framework Core, LINQ, JWT authentication, refresh tokens, RBAC, validation, business logic, dependency injection

Databases

PostgreSQL, SQL Server, Entity Framework Core migrations, relational data modelling, query optimisation, database maintenance and backup fundamentals

Tools and Platforms

Git, GitHub, GitHub Actions fundamentals, Visual Studio, Visual Studio Code, Swagger, Postman, Docker, Linux, Ubuntu, SSH, VPS deployment, CI/CD pipelines, server configuration fundamentals

Frontend Development

React, Next.js, TypeScript, JavaScript, Angular, HTML5, CSS3, Tailwind CSS, responsive design, API integration, forms, tables, dashboards

Architecture and Practices

Clean Architecture, layered architecture, repository pattern, dependency injection, RESTful design, multi-tenant systems, audit logging, error handling

Professional Skills

Business requirement analysis, communication, teamwork, initiative, debugging, problem-solving, documentation, production support, continuous learning

 LANGUAGES

Albanian
Native

English
Professional

 CERTIFICATES

- Web Application Development Professional (2023).
- MERN Full Stack Developer + Networking (2023).

 PROJECTS

FlowMetrics SaaS Analytics Dashboard

ASP.NET Core, React/Next.js, PostgreSQL, JWT, Docker

- Built a multi-tenant SaaS platform for managing companies, customers, invoices, analytics, and reports.
- Implemented REST APIs, JWT authentication, refresh tokens, role-based access control, tenant isolation, audit logging, and health checks.
- Developed dashboards, invoice workflows, reports, filters, organization management, and user permissions.
- Applied clean architecture principles and separated the system into API, Application, Domain, and Infrastructure layers.
- Integrated the frontend with protected backend endpoints and reusable business components.

Enterprise Permits and Appeals Platform

ASP.NET Core, Angular, SQL Server, REST APIs

- Contributed to an enterprise platform for managing permit applications, approvals, appeals, and administrative workflows.
- Implemented role-based permissions, multilingual content, notifications, reporting, exports, status tracking, and document-related workflows.
- Worked with complex business processes involving officers, division chiefs, directors, ministers, and appeal commissions.
- Investigated production issues using debugging, SQL queries, API testing, and application logs.
- Collaborated with the development team to implement functional requirements without disrupting existing workflows.

FCode TraceHub

ASP.NET Core, PostgreSQL, React/Next.js

- Developed a backend-focused platform for organizing projects, application activity, and operational data.
- Implemented controllers, services, repositories, validation, error handling, and integration tests.
- Structured the application using separation of concerns and reusable application layers.
- Used PostgreSQL integration testing to validate persistence and API behaviour.
